Expanding Horizons Internships (EHI) offers a paid summer internships and interactive educational seminars to low-income, high-achieving high school students who are first-generation college bound.

EHI made us more driven in pursuing our academic and professional goals, while furthering our understanding and awareness of the communities we live in. It made our dreams feel like they were attainable.

Karla, Class of 2016

Thanks to EHI, I have grown as an independent person; I am no longer afraid to travel and explore cities on my own. I attended Harvard University during the summer, where I took two college courses.

Javier, Class of 2015

EHI Interns receive 200 hours of seminars and job experience. Seminars are designed to provide youth with specific skills including:

- Professional Work-Place Skills
- Communications/Networking
- College Preparation
- Writing With Purpose
- Civic Participation
- Critical Thinking

The EHI experience changes interns’ lives, but if you ask anyone at our firm, each intern we’ve hosted throughout the years has made a positive and lasting impact on our lives, as well.

Julie Inouye, Dentons

The excitement and enthusiasm they bring to the job is refreshing. Also, it’s nice to think that we are enabling exposure to a world that would otherwise be less accessible!

Rebecca Eastman, Munger, Tolles, Olson LLP
